

ABOUT US

Climate Streamers Foundation is an international environmental non-profit based in The Netherlands with a vision to create a world where climate action is no longer a divisive issue.

In a society that is increasingly polarized, our aim is to provide a safe and inclusive space where people can freely express their thoughts and beliefs without fear of judgment.

By recognising the diversity of perspectives, sharing experiences and using leisure elements, we create platforms that stimulate hope, inspire action, and empower people to make a positive impact.

Want to open up meaningful climate conversations?

Discover our game: one deck of cards, 160 prompts, endless conversations
